

Message from the President of the Turkish Tennis Federation

We are very happy and proud to be hosting the Worldwide Coaches Workshop on behalf of the International Tennis Federation.

We all know that sport is very important for peace and friendship. All the esteemed managers and coaches from all over the world should not only have this in mind but also convey this to their fellow-sportman and players. A good sportman should always know that sport is a symbol of peace and friendship. When we look from another aspect, the humanbeing is different from all the other beings, as it is able to develop himself. The Worldwide Coaches Workshop is a key part of this personal development process.

My personal wish is that you, estimable coaches will not only be content with attending this Workshop, but that you continue to grow and follow the latest research and developments in the future.

I would like to show my respect and thanks, first of all to the President of the ITF and his staff, to the Turkish Tennis Federation and to all the staff working in Club Ali Bey, who have assisted in this organisation.

Azmi Kumova
Turkish Tennis Federation President
